

POWER BI INTERN DAY 2- TASK

Why This Dashboard?

A social agency needed a clear, reliable view of YouTube's content landscape in India—by language, by channel, and by total reach. This dashboard provides instant answers and trends at a glance.

What the Data Says

- **Total Subscribers Tracked:** 7bn
- **Total Videos Analyzed:** 6,461
- **Total Channels Included:** 4,342

1. Languages Driving YouTube Content

- Videos are **spread across 12 major Indian languages**.
- **Top languages by content volume:**
Hindi, Tamil, Telugu, Bengali, Malayalam.
- Visual: The donut chart shows content share—making it easy to spot which languages are leading.

2. Top Performing Channels

- **Speed Records, SonyMusicSouth, ETV Dhee, and T-Series** rank highest by number of videos.
- These channels shape what millions of viewers watch and influence trends in music, news, and entertainment.

3. Reliable and Clean Data

- The dashboard checks for duplicate entries, giving you confidence in every insight.
- The “Full Data Detail” table makes it easy to drill down into individual channels or videos on demand.

Takeaways for Decision Makers

- **See at a glance** which languages and which publishers dominate YouTube in India.
- **Spot opportunity:** Fast-growing languages and channels signal where to launch new campaigns—or find the next rising star.
- **Trust the results:** Automated duplicate detection means you're always working with accurate numbers.

This dashboard transforms messy YouTube data into simple, actionable trends for agencies, marketers, and content teams—helping you make smart decisions with confidence.
