

Subject: Letter of Recommendation for Internship

19 September 2025

To whom it may concern,

I am pleased to recommend **Saksham Kothari** (ID:HE082025), who completed a virtual internship with TopDataWorks from 18-Aug-2025 to 07-Sep-2025.

he were a key participant in the **Data Scientist** Team and demonstrated strong participation as a **Individual Contributor** . His consistent attendance and active participation were crucial to the team's success.

Data Science Team With the clean data in place, the Data Science team took over. They leveraged the MySQL database to apply various data science models. They focused on two main areas: classification and regression. Classification models were used to predict categorical outcomes, such as a video's kids safe. The outputs of these models provided valuable predictive insights that went beyond simple historical reporting.

I strongly recommend **he** for a PowerBI Developer position.

Please feel free to contact us for verification or further details.
